

Declaration

Directive 2011/65/EU, RoHS 2 and
Delegated Directive (EU) 2015/863

Dear Sir or Madam,

We hereby confirm that steute products comply with the Directives 2011/65/ EU and 2015/863/EU and do not contain any of the substances listed in these directives above the stipulated threshold values.

This declaration is based on information provided by our suppliers, with whom we are in constant contact regarding substance restrictions. They are obliged to supply steute only RoHS-compliant products.

We would like to clarify that lead may be present in quantities greater than 0.1% by mass in some copper and aluminium alloys, as well as in electronics used by steute. However, as steute does not exceed the threshold values of RoHS exemption* 6a-I, 6a-II, 6b, 6b-II, 6c and 7a, 7c-I, 7c-II for lead, all products in the "Monitoring and Control Instruments" category can still be supplied as RoHS compliant.

Note: A safety data sheet is not necessary.

If you have detailed questions on RoHS or REACH issues, please contact:
